maybe a documentary clip, any thing on youtube. And you can easily create and edit the video, upload to youtube with a few clicks of your mouse.coub is a looping video recorder, however the UI is clean and simple. App Timeout: Avoid accidentally quitting your app! [builtin for the chrome browser] Toggle.off uses short-circuit logic to give a numeric value between -1 (on) to 1 (off) in response to a specific question. When specified as an option, the question may be any of '?', '!', '&', '@', '%', '^', '*', or '#', at which point it outputs the integer containing the value of that character. Solve the mystery of the Joker using this Hidden Object Game. Choose the game's difficulty and watch as the free-roaming game-pad zooms you in to the screen you need to find to solve the crime. The present invention relates to an image projection optical system. More particularly, the present invention relates to a projection-type image display apparatus with a reflection-type screen that modulates illumination light irradiated from a light source. In a projector with a reflection-type screen that modulates the illumination light irradiated from a light source, an aperture diaphragm is arranged between the light source and the reflection-type screen to set the angle of view of the image projected on the reflection-type screen. The aperture diaphragm is arranged in the optical path of the illumination light from the light source and diverges the illumination light to reduce the illumination light into a diverging light. However, the aperture diaphragm arranged in the optical path of the illumination light degrades the intensity of the image projected on the reflection-type screen because the diverging light from the aperture diaphragm decreases. FIG. 2 is a schematic diagram illustrating the arrangement of conventional aperture diaphragm. The aperture diaphragm has a circular shape. A central opening of the aperture diaphragm has the same radius of the circular shape of the aperture diaphragm. A ring-shaped or annular portion is formed between the central opening and the outer edge of the circular aperture diaphragm. The outer edge of the annular portion is curved in the direction opposite to the central opening. Accordingly, the illumination light irradiated from a light source is converged by the central opening and then 82157476af
