
Neevia PDFtoolbox Suite v3.4.torrent - is a powerful and user-friendly application that enables you to create, edit, convert, and view PDF files. HIGHLIGHTS: 1) It can be used as a drop-in replacement for the pdfviewer (or any other pdf viewer) and contains an easy-to-use tabbed interface with thumbnail previews for all open files for quick navigation; 2) it includes extensive file import/export functionality including bulk conversion of office documents (including those with passwords), email attachments, web archives(*.zip, *.jar, *.rar), text-based documents and web pages saved as PDFs; 3) it has a built-in archiving functionality for creating self-extracting archives from existing PDF documents. Neevia PDFtoolbox Suite v3.4.torrent includes file conversion functionality, which allows you to convert document files to PDF format. You can also perform OCR (Optical Character Recognition) on scanned documents and convert them to searchable PDF files. This version includes a new feature called PrintToPDF for printing your application's output to a PDF file. New Features: 1) Added Improved OCR scanning quality; 2) User interface improvements.
